

Roses of June

As spring blossoms with new growth across North America, ZYGO Industries, Inc. wants to show you what's new with our product lines.

Let us give you a sneak preview into four of our speech generating devices.

Please contact ZYGO Customer Service, your local area representative, or our authorized dealers to arrange an in-service demonstration of any of our AAC and AT products.

Product Highlights

Optimist 3

Dynamic display built with XP power, this lightweight communication device is worthy of a close look.

ZYGO's Optimist 3 comes complete with software of your choosing. It's a powerful augmentative and alternative communication (AAC) aid that is

ideal for direct selection on its bright, all-light readable touch screen or for scanning on its dynamic display. Carrying this three pound device by its convertible handle stand is easy. The Crusoe™ TM5800

1 GHz processing speed makes message selection fast. Supplied with USB keyboard and mouse.

Talara 32

This simple communication device has levels, direct and switch scanning access, and flexible size key patterns making it easily customizable for both children and adults with wide ranging abilities and needs. It is similar in many respects to the popular ZYGO Macaw, however the Talara is easier to set up and use. This is a capable device when you don't want to pay for features you won't be using.

Polyana 4 with Persona

Our latest model text to speech device brings the best of Persona to a new platform.

Polyana is light weight, small sized, and easy to carry. The attached amplified speaker base-pack provides for exceptionally loud, clear output spoken by DECTalk speech synthesis.

Persona is purposely designed for literate users who need to talk. Formulate messages letter-by-letter, select

words through word completion and prediction, and phrases via abbreviation/expansion and a phrase list. Access by the keyboard, touch screen, and by switches.

Request a free Persona demo CD by phone or by using our web site literature request.

Spok21

The Spok21 is a modern, dual-display, text-to-speech device. It has a multi-line screen and forward-facing display. Toggle between any two languages using the natural sounding Babel synthesizer. Topic levels with quick phrases and stored messages speed conversation. Type or switch scan on the combination keyboard.
